

Jaisgurnoor Singh

Full-Stack Developer | AI & Robotics Enthusiast

Portfolio | GitHub | LinkedIn | Jalandhar, Punjab, India

SUMMARY

Detail-oriented Computer Science Engineering student specializing in Artificial Intelligence. Experienced in building high-fidelity full-stack applications and local AI implementations. Proven track record in hackathons and developing proactive agentic systems. Passionate about bridging the gap between low-level systems and real-world AI applications.

EDUCATION

B.E. in Computer Science Engineering (AI Focus)

2025 – Present

Chitkara University, Punjab, India

CGPA: 9.16

- Relevant Coursework: Operating Systems, Soft Computing, C Programming, Data Structures & Algorithms.
- Certifications: AZ-900: Microsoft Azure Fundamentals (Completed).

TECHNICAL SKILLS

Languages: C, C++, Python, JavaScript, TypeScript

AI/ML: Local LLM Deployment (Ollama, MLX, Gemma), Vector Databases, Agentic Workflows

Web Development: React, Next.js, Node.js, Tailwind CSS, Vercel

Tools: Git/GitHub, VS Code, Cursor, Docker, Apple Silicon Optimization

KEY PROJECTS

Kinetic – Fintech Web Application

2026

- Designed and built a modern fintech platform with a focus on clean UX and responsive design using React and Next.js.
- Implemented performant, component-driven architecture with server-side rendering for fast load times and SEO optimization.
- Deployed on Vercel with a scalable front-end structure suited for financial product interfaces.

APEX: Proactive AI Agent

2026

- Designed a "continuous awareness" system optimized for local MacBook hardware.
- Implemented a custom configuration framework (SOUL.md) to manage agentic behavior and memory.
- Focused on low-latency response times using local model integration.

Live AI Vision System

2026

- Developed a real-time computer vision application integrating local LLMs for environment description.
- Optimized for high-performance hardware to ensure fluid, cinematic interaction.

Full-Stack Portfolio & Resume Engine

2025 – Present

- Built and deployed a professional portfolio on Vercel featuring "scrollytelling" UI/UX.
- Integrated automated PDF generation for dynamic resume updates.

EXPERIENCE & ACTIVITIES

Research Team Member – Evolve AI Club

2025 – Present

Chitkara University

- Contributing to AI research initiatives and collaborative projects within the university's dedicated AI community.

- Engaging in knowledge-sharing sessions on agentic workflows, LLM applications, and emerging AI methodologies.

Hackathon Participant – DoraHacks & Actian VectorAI Challenge

2026

- Competed in high-intensity builds focusing on Vector Databases and AI-integrated software.
- Collaborated on rapid prototyping of system-level AI tools.

Technical Content & Learning

Ongoing

- Active contributor to local developer communities, focusing on vibe coding and agentic IDE workflows.

CERTIFICATIONS & HONORS

Certifications

- Azure AI-900: Microsoft Azure AI Fundamentals
- AZ-900: Microsoft Azure Fundamentals
- Disaster AI – Coursera
- HTML-5 – Infosys
- Python Pro – Infosys
- Frontend Engineering – Meta
- AI Basics – IBM

Honors & Awards

- Academic Excellence: CGPA 9.16 – Consistently high marks in core engineering modules (Operating Systems, Soft Computing).
